Scriptel® ScripTouch® Compact 1X5 USB

Electronic Signature Pad

ST1550 ProScript Device Interface

ST1551 EasyScript Device Interface

The ScripTouch Compact 1X5 USB signature pad features an easy to carry and store form factor with backlit LCD for immediate rendering and visual feedback to the signer that is ideal for professionals that need to capture electronic signatures on the go.

Scriptel's Compact signature pad is available in EasyScript and ProScript device interfaces.

The EasyScript device interface is unique to Scriptel and is especially interesting for pure cloud-based applications that need to work across the major browsers and across Windows, Mac and Linux. With appropriate design, no software install is needed on the client PC.

The ProScript device interface supports communication between the signature pad and software applications that have embedded Scriptel APIs or use the Scriptel OmniScript universal signature integration platform.

Available Software and Integration Support for:

ProScript (ST1550)

- Microsoft Word and Excel plugins
- Adobe Acrobat and Reader plugins
- ScripTouch Sign and Save signature image and data capture application
- Supports OmniScript universal signature integration platform
- Extensive APIs and software libraries in .NET (C++, VB, C# and F#)
- Windows COM

EasyScript (ST1551)

- Software libraries and examples in Java, JavaScript, PHP, ASP .NET, C, C++ and Objective C
- APIs and software libraries also available for .NET (C++, VB, C# and F#)
