

INTERLINK
ELECTRONICS®
eSign Anywhere™

Discover the **ePad™**vision

Screen Customization

The ePad-vision is the first esignature capture device that lets your business process owner – not just the IT department – modify certain display parameters. Give your non-IT staff the ability to:

- Modify compliance & affirmation text
- Select an esignature background image
- Upload rotating marketing slicks
- Change the esignature color, thickness, and location.

Low Total Cost of Ownership

ePad-vision passes stringent reliability and international certification tests. The firmware, passive stylus, and writing surface of ePad-vision can be easily and inexpensively replaced in-field. This saves time & money – no need to send the ePad to IT or the manufacturer for upgrades.

Future-Proof Your Investment

ePad-vision comes bundled with IntegriSign® Desktop software, which offers plug-ins for capturing esignatures in Acrobat, Word, Excel, and Outlook documents. It is also compatible with IntegriSign® Pro and IntegriSign Emcee™ software, both of which provide added functionality to your esigning experience. No matter how your project evolves, ePad-vision will serve your business needs today and tomorrow.

IntegriSign Express

For on-demand esignatures, Interlink offers IntegriSign® Express, an easy-to-use SaaS-based solution, available as a stand-alone product or as a fully integrated application within NetSuite.

Versatility Beyond Compare: Capture eSignatures, Additional Revenue, Customer Data

ePad-vision redefines the capabilities of an electronic signature device. This latest addition to Interlink's ePad Family not only captures secure, legally-binding esignatures, it also lets you display full-color, targeted marketing messages that help your customer-facing representatives cross-sell effectively. The selectable onscreen check boxes and response buttons make it easy for customers to opt-in to special offers and products, while also enabling you to obtain important customer feedback.

With its advanced, innovative technology, never before seen at this price point, the versatile ePad-vision is a must-have esignature solution!

Capture eSignatures: Create Unique Backgrounds

ePad-vision lets you customize your esignature capture screen with full-color graphics. Create unique backgrounds just as you would with personalized checks. Don't stop there. Define the color, thickness, and location of the signature to be in perfect harmony with your chosen background image.

In addition to offering a 'beautiful' esigning experience, ePad-vision works in tandem with Interlink's software to provide secure and reliable eprocesses. When you present onscreen compliance and affirmation text, you ensure customers make informed decisions. Once the esignature is captured, Interlink's esignature software takes over. IntegriSign Desktop, bundled with every ePad-vision, securely and permanently embeds the esignature into the document. Any attempt to tamper with the document will be detected.

Capture Revenue: Market Effectively

The USB-powered ePad-vision is the perfect customer-facing tool, both in-house and in-field. Capitalize on the onscreen real estate and use ePad-vision's stunning image quality to present targeted ads, rotating marketing messages, promotional offers, and invitations to enroll in special programs. Customers can respond instantly, enabling you to close sales and generate increased revenue on-the-spot.

Capture Data: Get Closer to Customers

The bi-directional, interactive display permits users to accept compliance and affirmation text, as well as respond to onscreen customer surveys. Leverage the ability to use response buttons and check boxes to capture useful and actionable customer information.

Security & Compliance

ePad-vision eliminates security concerns by utilizing Interlink's IntegriSign Desktop software to permanently bind the signature to the document. The software will detect any attempted alterations and render the esignature visibly invalid. You will meet your stringent regulatory and compliance requirements by presenting affirmation text and capturing the signer's intent throughout the process.

Application Examples

Financial Services

- Account Opening
- Loan Origination
- Credit Card Application
- eMortgages
- eNotarization
- Account Changes
- Cross-Sell Effectively

Healthcare

- Patient Consent
- HIPAA Compliance
- Medical Records
- Patient Charts
- Present Other Treatment Options

Retail

- eContracts
- Service Agreements
- Delivery Confirmations
- Credit Card Applications
- Cross-Sell Additional Services

Internal Processes

- HR Documents
- Expense Reports
- Invoices
- Estimates & Quotes
- Purchase Orders
- Proposals
- Engineering Work Orders

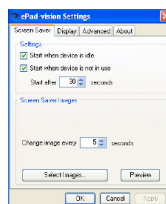

Software Developer Kit (SDK)

With the ePad-vision .NET assembly and COM SDK, your IT experts can develop multiple-step eprocesses that control your intricate display parameters, including onscreen presentation specifications and control of bi-directional communication.

Key SDK Features

- **Implement eProcesses:** Upload XML code to create your customized presentation process.
- **Multiple Fonts & Colors:** Select from more than 20 fonts to present text in a variety of styles. With a palette of 64,000 available colors, you can also develop interfaces that are appealing to customers.
- **Scrollable Text Boxes:** Program scrollable text boxes that allow users to easily read through information and signing-specific text.
- **Onscreen Surveys:** In order to obtain valuable customer feedback, input onscreen surveys that can be presented to customers during the esigning process.
- **Selectable Options:** Utilize ePad-vision widgets that enable creation of customer opt-ins or selections via check boxes, response buttons, and radio buttons.

Intuitive Control Panels

ePad-vision Control Panel: Non-IT staff can upload marketing slicks, select the esignature screen background image, or modify the color, thickness, and location of the esignature.

IntegriSign Desktop Control Panel: Non-IT staff can make updates to affirmation and compliance text.
