IDpack Pro

PRODUCT OVERVIEW

IDpack Pro is reliable plastic ID card printing software that supports the CR-80 plastic ID card format used by major card printer manufacturers. It allows you to design and produce photo ID cards, badges and nametags for all kinds of uses: employees, schools, libraries, membership, corporate security cards, convention cards and all other identification needs.

IDpack Pro is network ready: you can share the same database, photo and card setup with more than one computer so you can produce more cards at the same time.

Documentation, Installation and Templates

Easy to learn and use, **IDpack Pro** is well documented and installation is completed in a few minutes. It also comes with templates to help you set up your first Photo ID Card.
