

# Next-Generation Connectivity.

Compatible, Reliable,  
and Secure

Upgrade  
to HSB

## HSB (HID-USB) Technology

HSB is replacing older USB technology.

- Designed for high security at the Operating System level
- Common HID (Human Interface Device) standard makes upgrades easy
- Compatible with all existing applications
- Upgrading is simple: install SigPlus® software and select -HSB

New  
Dual Serial/HSB

## BHSB (Dual Serial/HID-USB)

Universal BHSB model LCD pads have a single cable that supports serial and HID-USB connections.

- Maximum flexibility for Windows, NT, or Ethernet
- Available on select LCD pads at same price as USB and HSB

New  
Ethernet

## Ethernet (A-ETH1 Adapter)

Connects to serial (-B) or -BHSB models for ethernet compatibility

- DHCP or fixed IP addressing
- Encryption option available
- Useful for long-distance connections
